Roomier finish for respite centre

ABOUT 100 people celebrated the official opening of the Logan West Respite Centre's \$240,000 expansion last Friday.

The new facilities will allow the centre to provide more aged care services, such as increasing its number of day respite patients.

Flexible Support Services program manager Charlotte

Patrick said the three new offices and recreation room would be put to good use.

"The aged day respite clients will now have a lot more room for activities and entertainment," she said.

"Our new offices will also allow us to expand with more staff while providing more room for existing staff."

Mrs Patrick said the official launch was very successful.

"There was some lovely food and it was just a really good day."

The Home and Community Care program funded the project.

The centre is located at Wineglass Drive, Hillcrest.
